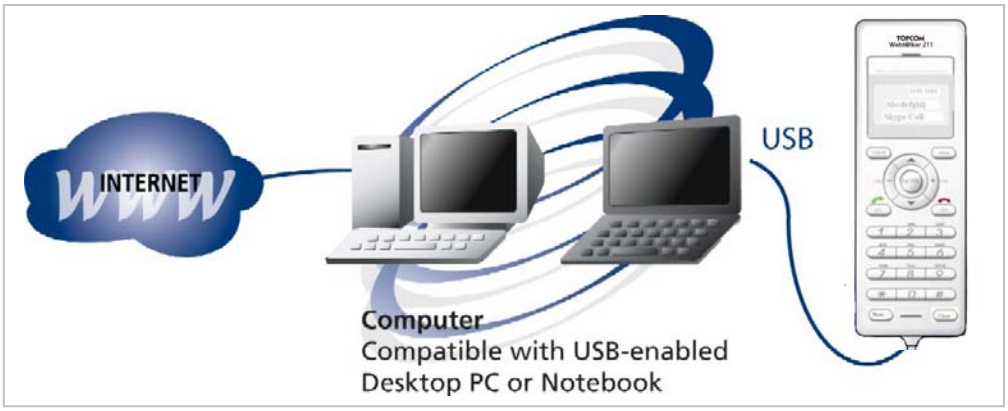
The WEBT@LKER 211, the ideal solution to make **FREE INTERNET CALLS** from PC to PC.

Simply plug the WEBT@LKER 211 into the USB port of your PC, download Internet telephony software like Skype®, and you can start making **FREE calls** over the internet. In no time, you're connected to your friends, family or colleagues all over the world.

The WEBT@LKER 211 is fully compatible with the Skype-interface and can be used as audio device with other services as net2phone, babble, MSN, etc for voice communication. It's designed similar to a mobile phone with quick dial and volume control buttons, which makes it very easy to use. The LCD (with backlight) makes it possible to display caller-ID, contact list and calling list.



The possibilities described in this brochure are under reserve of changes and services offered by your network operator or other service providers
